

Guidelines for Control of Content on Fownhope's Council and Parish Web Sites

The content of the Parish Council web site will be controlled by the Parish Clerk.

The content of the Parish web site will be controlled by the Web Master using the following guidelines:

1. The site is to be used for the display of information about the Parish and events being held in it.
2. Any information received from a club or organisation based within the Parish is to be placed in a section clearly identified as belonging to that body.
3. Only information which can be displayed legally and can be reasonably seen to be accurate is to be displayed.
4. Particular care is to be taken with content containing material lobbying or promoting a particular cause which might be contentious. In these cases the Council Chairman is to be consulted prior to placing the material on the site.
